ReviewPro quality ratings: The tables show the GRI for hotel guests as calculated by ReviewPro®, a company which specializes in measuring the online reputation of hotels. This index is calculated for each hotel, through the analysis of variables linked to customer comments which are posted on hundreds of social network platforms, hotel review websites, and websites of OTAs (online travel agents). Apart from daily reviews, it also takes into account the historical data for the past 365 days, thus adding more weight to the more recent reviews. A rating of over 80% suggests a positive experience. The index is qualitative and can be used to evaluate the progress of the quality of services provided. For the purposes of calculation, data on 1,126 hotels of various categories and different regions of Greece have been analysed.

Arrivals based on the Bank of Greece Border Survey: The figures are estimates based on a sample survey, and pertain to arrivals of residents of other countries, irrespective of the travel mode (air, road, sea) and regardless of nationality, i.e. they include Greek nationals permanently residing abroad but do not include foreign nationals permanently residing in Greece.

Receipts based on the Bank of Greece Border Survey: The Border Survey estimates receipts based on a sample survey among residents of other countries who visit Greece.
